Notes:

- Assets are defined as buildings, equipment and structures owned or leased by the NRC in Canada.
- Buildings that are part of a campus or grouping of buildings (ex: 1200 Montreal Road) are listed under their individual building names (or building numbers) and individual addresses, not the campus name. For example, we will find M-19 in the inventory, but not the Montreal Road campus.
- Only NRC owned or leased properties are included. Inquiries related to buildings managed by other government departments should be addressed to that department.
- Information for leased buildings was obtained from the Landlords for each building. NRC does not warrant the information for leased facilities.
- Where there is no asbestos in a building, an asbestos management plan is not required.
- Equipment, Structure and Small Building (ESSB) assets are defined as assets owned or leased by the National Research Council that are standalone assets not part of base building, and small buildings below 15m². These are grouped under the ESSB asset category name.
